Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	4-Year Quanto Autocallable Barrier Phoenix Note linked to Anglo American PLC, Freeport-McMoRan Inc., Glencore PLC and Barrick Gold Corporation
Product identifier	ISIN: XS2658415547 | Valor: 129156915
Product manufacturer	Goldman Sachs International (see http://www.gspriips.eu or call +442070510101 for more information)
Competent Authority	Financial Conduct Authority, United Kingdom
Date of this document	September 6, 2023 13:11:58 London local time

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

The product is in the form of a note issued under English law. It is an interest bearing security, but your interest is not guaranteed. The payment obligations of the product manufacturer are not guaranteed by any entity.

Objectives

The product pays interest that is linked to the performance of the underlying assets (as defined below). What you will receive at the end of the term of the product is not certain and will depend on the performance of the ordinary shares of Anglo American PLC (ISIN: GB00B1XZS820), Freeport-McMoRan Inc. (ISIN: US35671D8570), Glencore PLC (ISIN: JE00B4T3BW64) and Barrick Gold Corporation (ISIN: CA0679011084), listed on London Stock Exchange and New York Stock Exchange (the **underlying assets**). In addition, you will take the risk that some or all of the value of your investment may be lost at the end of the term of the product. The term of the product will end no later than September 21, 2027. However, the product may terminate early depending on the performance of the underlying assets. Each note has a face value of GBP 1,000. The issue price is 100.00% of the face value. The product is not listed on an exchange. The issue date is September 21, 2023.

Interest: If the closing price of each underlying asset on an interest observation date is at or above its interest barrier, you will receive interest of GBP 21.125 on the corresponding interest payment date for each note that you hold. In this case, you will also receive GBP 21.125 for each previous interest payment date where no interest has been payable. Interest observation dates are each trading day rolling quarterly from December 14, 2023 (inclusive) to September 14, 2027 (inclusive). Interest payment dates are dates falling 5 business days after each interest observation date.

Autocall feature: If the closing price of each underlying asset on any autocall observation date is at or above its autocall barrier, the product will terminate on the corresponding autocall payment date. In this case, you will receive GBP 1,000.00 in addition to any interest payable on or around such date for each note that you hold. Autocall observation dates are each trading day rolling quarterly from March 14, 2024 (inclusive) to June 14, 2027 (inclusive). Autocall payment dates are dates falling 5 business days after each autocall observation date.

Repayment at maturity:

This section applies only if no autocall occurs as described above.

On September 21, 2027, for each note that you hold:

1. If the closing price of the underlying asset with the lowest performance (as compared with its initial reference price) on September 14, 2027 is at least equal to its barrier price, you will receive GBP 1,000.00; or
2. *Otherwise*, you will receive GBP 1,000.00 multiplied by (i) the closing price of the underlying asset with the lowest performance (as compared with its initial reference price) on September 14, 2027 divided by (ii) the strike price of such underlying asset.

The strike prices, barrier prices, initial reference prices, interest barriers and autocall barriers are shown below.

Underlying asset	*Initial reference price*	*Strike price*	*Barrier price*	*Interest barrier*	*Autocall barrier*
Anglo American PLC	TBD	100.00%*	40.00%*	40.00%*	100.00%*
Freeport-McMoRan Inc.	TBD	100.00%*	40.00%*	40.00%*	100.00%*
Glencore PLC	TBD	100.00%*	40.00%*	40.00%*	100.00%*
Barrick Gold Corporation	TBD	100.00%*	40.00%*	40.00%*	100.00%*

* of the initial reference price of the relevant underlying asset.

The initial reference price of an underlying asset is the closing price of such underlying asset on September 14, 2023.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the underlying assets, the product and the product manufacturer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

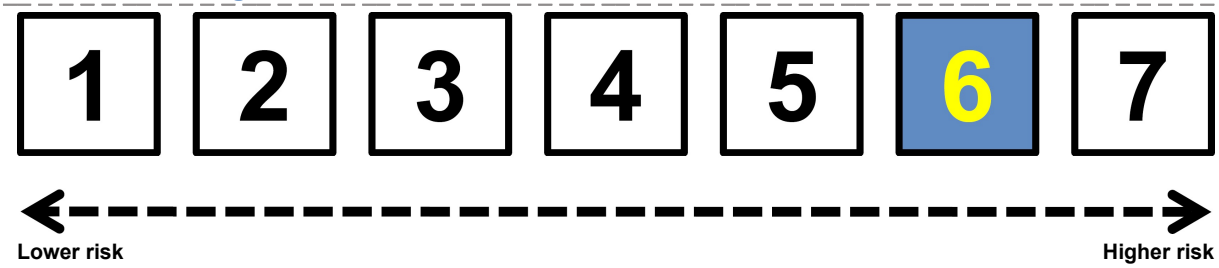

Intended retail investor

The product is intended to be offered to retail investors who:

1. have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, with experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. seek income, expect the movement in the underlying assets to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below and understand that the product may terminate early;
3. accept the risk that the issuer could fail to pay or perform its obligations under the product but otherwise are able to bear a total loss of their investment;
4. are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below; and
5. are making use of professional advice.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 4 years. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This takes into account two elements: (1) the market risk - that the potential losses for future performance are rated at a high level; and (2) the credit risk - that poor market conditions are deemed very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed or interest you may be paid under the investment.

Investment performance information

Main factors likely to affect future returns on the product

Your return on the product at the end of the recommended holding period will principally be affected by (1) the price at which you purchase the product, (2) the performance of the underlying assets over the recommended holding period and of the exchange rate between the product currency and the underlying assets currencies and (3) the ability of the issuer to make payments that become due on the product. The value of the product before the maturity date or early termination of the product will also be affected by general economic and market conditions, the volatility of the underlying assets (which is a measure of the extent of movement in the prices of the underlying assets), interest rates, exchange rates, the dividend yield of the underlying assets, the correlation between the various underlying assets, the remaining time to maturity and the ability of the issuer to make payments.

What could affect my return positively?

• An increase in the prices of the underlying assets

What could affect my return negatively?

• A decrease in the prices of the underlying assets

• The occurrence of a barrier event

• Your overall return may be negatively affected if the product early terminates.

• The issuer's inability to make payments on the product when they fall due

The factors listed above provide general guidance on how changes in the prices of the underlying assets may affect your return if you purchase the product at inception and hold it to the end of the recommended holding period. If you purchase or sell the product after inception, your return on the product will also be affected by the purchase or sale price and the prices of the underlying assets at the time of sale or, in the case of a purchase, at and following the time of purchase. The precise impact will depend on the timing and effects of these changes, and the above list should not be viewed as guaranteeing a particular outcome. See "1. What is this product?" for a discussion of how the payments you may receive during the life of the product and the payment you may receive at the end of the recommended holding period will be calculated.

In severely adverse market conditions, if you hold the product to the end of the recommended holding period, you may lose your entire investment.

If you sell the product in severely adverse market conditions prior to the recommended holding period, your return may be lower than what you would have received if you held the product to the end of the recommended holding period and may be as low as zero. See ”5. How long should I hold it and can I take money out early” below for additional information.

What happens if Goldman Sachs International is unable to pay out?

The product is not covered by an investor protection or guarantee scheme. This means that if we become insolvent you may suffer a total loss of your investment.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest GBP 10,000.00. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment: GBP 10,000.00			
Scenarios	***If you cash in after 1 year***	***If you cash in after 2 years***	***If you cash in at the end of the recommended holding period***
Total costs	GBP 1,137.00	GBP 886.00	GBP 886.00
Impact on return (RIY) per year	12.05%	4.84%	2.39%

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

The table shows the impact on return per year.			
One-off costs	*Entry costs*	2.39%	The impact of the costs already included in the price. This includes the costs of distribution of your product.
	Exit costs	0.00%	Not applicable.

How long should I hold it and can I take money out early?

Recommended holding period: 4 years

The recommended holding period for the product is 4 years as the product is designed to be held until maturity; however the product may terminate early due to an autocall or an extraordinary event. You have no contractual right to terminate the product prior to maturity.

The manufacturer is under no obligation to make a secondary market in the product, but may repurchase the product prior to maturity on a case-by-case basis. In such circumstances, the price quoted will reflect a bid-ask spread and any costs associated with unwinding the hedging arrangements of the manufacturer in connection with the product. In addition, the person who sold you the product may charge you brokerage fees when you sell the product.

How can I complain?

Any complaint regarding the person advising on or selling the product (such as your intermediary) can be submitted directly to that person. Complaints about the product and/or the conduct of the product manufacturer may be lodged in accordance with the steps set out at http://www.gspriips.eu. Complaints may also be addressed in writing to Goldman Sachs International, PRIIP KID - Compliance Securities, Plumtree Court, 25 Shoe Lane, London, EC4A 4AU, United Kingdom or may be sent by email to gs-eq-priip-kid-compliance@gs.com.

Other relevant information

Any additional documentation in relation to the product, in particular, the issuance programme documentation, any supplements thereto and the product terms are available free of charge from the product manufacturer upon request. Where the product is issued pursuant to the EU Prospectus Regulation (Regulation (EU) 2017/1129, as amended) or the UK Prospectus Regulation (Regulation (EU) 2017/1129 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 and regulations made thereunder, as amended), as applicable, such documentation will also be available as described on http://www.gspriips.eu.
