Type

This product is an unsecured debt instrument governed by English law.

Term

This product has a life span of 6 years 7 days but can be redeemed earlier according to the conditions indicated in the "objectives" section below.

Objectives

This product is designed to provide a return when the product is redeemed (either at maturity or when redeemed early). It is possible for the product to be redeemed early at the discretion of the Issuer. If the product is not redeemed early, both the return and the capital redemption amount will be linked to the performance of the Reference Underlying. Your capital will be fully at risk when investing in this product.

Early Redemption

On each Issuer Call Date, the Issuer has the right to terminate the product at its discretion. In this case, the product will be redeemed early and you will receive :

100% of the Nominal Value plus the Issuer Call Coupon multiplied by the number of periods the product has elapsed since the Initial Observation Date.

A period corresponds to one month.

Final Redemption

On the Maturity Date, provided that the product has not been redeemed early, you will receive a final redemption amount.

- If the Final Level of the Reference Underlying is at or above the Final Barrier, you will receive:

100% of the Nominal Value, plus the performance of the Reference Underlying multiplied by the Participation.

- If the Final Level of the Reference Underlying is below the Final Barrier and at or above the Capital Barrier, you will receive:

100% of the Nominal Value.

- Otherwise, you will receive the Final Level of the Reference Underlying divided by the Capital Barrier and multiplied by the Nominal Value. In this scenario, you will suffer a partial or total loss of your invested amount.

Additional Information

- The level of the Reference Underlying corresponds to its value expressed as a percentage of its Initial Value.
- The Initial Value of the Reference Underlying is its value observed on the Initial Observation Date.
- The Final Level is the level of the Reference Underlying observed on the Final Observation Date.
- The performance of the Reference Underlying is calculated as its Final Level minus 100%. The performance is multiplied by the Nominal Value.
- Coupons are expressed as a percentage of the Nominal Value.
- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment

- Seek a product offering capital growth and have an investment horizon in line with the recommended holding period stated below.

- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

The risk indicator assumes you keep the product for 6 years 7 days.
The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Inflation Risk : if the current economic situation characterized by high inflation persisted throughout the life time of the product, then the “real” return of the product, equal to its return minus the inflation rate, might be negative.

The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.
