Type

This product is an unsecured debt instrument governed by English law.

Objectives

This product is designed to provide a return when the product is redeemed (either at maturity or when redeemed early). It is possible for the product to be redeemed early at the discretion of the Issuer. If the product is not redeemed early, both the return and the capital redemption amount will be linked to the performance of the Reference Underlying. The product provides partial capital protection at maturity only. Some of your capital will be at risk when investing in this product.

The product is a fixed term investment which is designed to generate a payoff at maturity linked to the performance of the Reference Underlying. The product provides partial capital protection at maturity only. Some of your capital will be at risk when investing in this product.

Early Redemption

On each Issuer Call Date, the Issuer has the right to terminate the product at its discretion. In this case, the product will be redeemed early and you will receive :

100% of the Nominal Value plus the Issuer Call Coupon multiplied by the number of periods the product has elapsed since the Initial Observation Date.

A period corresponds to three months.

Final Redemption

On the Maturity Date, provided that the product has not been redeemed early, you will receive a final redemption amount.

- If the Final Level of the Reference Underlying is at or above its Initial Level (100%), you will receive:

100% of the Nominal Value, plus the performance of the Reference Underlying multiplied by the Participation.

- If the Final Level of the Reference Underlying is below the Final Barrier and is at or above the Capital Barrier, you will receive:

If the Final Level of the Reference Underlying is below its Initial Level and is at or above 100%, you will receive:

100% of the Nominal Value.

- Otherwise, you will receive the Final Level of the Reference Underlying multiplied by the Nominal Value. In this scenario, you will suffer a partial or total loss of your invested amount.

Additional Information

- The level of the Reference Underlying corresponds to its value expressed as a percentage of its Initial Value.
- The Initial Value of the Reference Underlying is its value observed on the Initial Observation Date.
- The Final Level is the level of the Reference Underlying observed on the Final Observation Date.
- The performance of the Reference Underlying is calculated as its Final Level minus 100%. The performance is multiplied by the Nominal Value.
- Coupons are expressed as a percentage of the Nominal Value.
- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment

Intended Retail Investor

The product is aimed at investors who:

- Have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards.
- Seek a product offering capital growth and have an investment horizon in line with the recommended holding period stated below.
- Are able to bear a partial loss, or total loss of their investment and any potential return in case of default of the Issuer and / or Guarantor.
- Understand that the minimum reimbursement only applies at maturity and they could receive less than this amount if the product is sold beforehand.
- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

The risk indicator assumes you keep the product for 7 years 2 days.
The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are very unlikely to impact our capacity to pay you.

You are entitled to receive back at least 60% of your capital (where "capital" means Nominal Value and not invested amount). Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before the Maturity Date.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Investment GBP 10,000.00		**1 year**	**4 years**	**7 years 2 days**

Favourable scenario	**What you might get back after costs** Average return each year	**GBP 9,974.26** -0.26%	**GBP 12,645.03** 6.04%	**GBP 15,265.00** 6.22%

This table shows the money you could get back over the next 7 years 2 days, under different scenarios, assuming that you invest GBP 10,000.00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF SOCIÉTÉ GÉNÉRALE IS UNABLE TO PAY OUT?

If the Issuer defaults you may only claim any unpaid amount from Société Générale (the Guarantor). Should Société Générale default or file for bankruptcy, you may suffer a partial or total loss of the invested amount. If the Issuer and/or the Guarantor becomes subject to resolution measures in the form of the bail-in tool ("bail-in"), your claim may be reduced to zero, converted into equity or its maturity may be postponed. Please be aware that your Investment is not covered by any investor compensation or guarantee scheme.

Please find the ratings of Société Générale at https://www.societegenerale.com/en/measuring-our-performance/investors/debt-investors/ratings.

WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for different holding periods. They include potential early exit penalties. The figures assume you invest GBP 10,000.00. The figures are estimates and may change in the future.

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment GBP 10,000.00

Scenarios	If you cash in after 1 year	If you cash in after 4 years	If you cash in at the end of the Recommended Holding Period
Total costs	GBP 933.44	GBP 1,116.01	GBP 1,014.70
Impact on return (RIY) per year	9.33%	2.59%	1.39%

Composition of Costs

The table below shows:
- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	1.39%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended Holding Period: 7 years 2 days, which corresponds to the product maturity.

Under normal market conditions, Société Générale or an entity of its group ensures a daily secondary market during the life of the product by providing bid and offer prices expressed as percentages of the nominal value and the difference between the bid and offer prices (the spread) will not be more than 1.00% of such nominal value. If you want to sell the product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell and you may sustain a partial or total capital loss. In unusual market condition, the resale of the product may be temporarily or permanently suspended.

HOW CAN I COMPLAIN?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the product manufacturer can be submitted to Société Générale at the following address: SOCIETE GENERALE, Regulatory Information Department, 17 cours Valmy, 92987 PARIS LA DEFENSE CEDEX, FRANCE - SG-complaints-kid@sgcib.com (http://kid.sgmarkets.com).
