60-60 MEMORY INCOME AUTOCALL

SEPTEMBER 2025 FACTSHEET

Target Return: **USD = 7.00% p.a.**

Investment Description

A 6 year investment linked to the performance of Swiss, European, Japanese, and US Indices.

If on any of the quarterly observation dates, including the Final Observation date, the closing levels of all the Underlyings are at or above the Income Trigger, the income will be paid plus any previously missed income payments.

This investment will autocall and mature early if all Underlyings are equal to or above the Autocall Trigger on any quarterly observation date starting at 12 months. If early maturity occurs, full capital is returned and the investment will end. If early maturity does not occur the investment will continue to the Final Observation date.

At the Final Observation date, if all Underlyings are at or above the Capital Protection Barrier, then full capital is returned. If any Underlying is below the Capital Protection Barrier, capital return will be reduced on a 1-for-1 basis. For example if the worst performing Underlying has fallen to 40% of its original level, 40% of the capital will be returned.

Benefits

- Opportunity for regular income payments even where the Underlyings show significant falls.
- A memory feature, whereby income previously unpaid, will be included when the income trigger is next activated.
- Autocall feature potentially shortens the investment term and is triggered by minimal growth.
- Early maturity provides an opportunity to re-assess client's wealth strategy.
- Daily pricing.

Risks

- The return is limited to the pre-defined investment terms.
- The income payment is conditional upon the Underlying performance.
- Investors will be exposed to the credit risk of the Issuer. If the Issuer becomes insolvent or cannot make the payments on the Product for any other reason, investors could lose some or all of their investment. A decline in the Issuer's credit quality is likely to reduce the market value of the Product and therefore the price an investor may receive for the Product if they were to sell them in the market.
- There is a risk to capital should one of the Underlyings breach the Capital Protection Barrier on its Final Observation date.
- Should investors need to sell their investment before maturity, the trading price will likely mean they get back less than they invested.

IDAD was established in 2002 and our approach from the outset, is what we call the "IDAD Difference". The selection of the investments we offer is not decided in terms of profitability alone and when developing investment products, we favour evidence over dogma. We are happy to work with advisers and product providers alike to deliver a range of investment options to suit differing client wealth strategies. We're proud of our approach to business as well as the investments delivered as a result of the "IDAD Difference". We are committed to building upon our reputation for bringing benefits to all involved in the investment process, but most importantly to the clients.

Natixis provides financial services. The Company offers housing asset and wealth management, corporate and investment banking, and other investment services. Natixis serves energy, metals & mining, real estate, transportation, telecoms & tech, environment, healthcare, and insurance sectors worldwide.

Rationale

Structured products are becoming increasingly popular for investors due to the wide variety of payoffs and levels of protection that can be achieved by the different types of structures that are available.

The opportunity for an income stream can be of key importance to investors as part of their wealth planning. The probability of an income payment being triggered is increased with this investment as an Underlying needs to show a fall of 40% from its initial level on any observation date before the income stream is disrupted. The investment also benefits from a memory feature so that if any income payments have missed being paid, they will catch-up the next time all Underlyings are above the Income Trigger on an observation date. The Underlyings have been selected in order to support the anticipated delivery of that income.

The autocall payoff can bring an early return of capital allowing the opportunity for a re-assessment of investment strategy. The value of this feature cannot be underestimated as it brings with it the opportunity to secure capital value, as well as the chance to take advantage of future market trends.

To manage the capital risk, a final level barrier set at 60% means an Underlying must fall by more than 40% over the full term before capital is at risk.

Suitability

This product may be suitable for investors who:

- Are seeking the opportunity for higher returns than current cash rates at the time this product was launched.
- Are seeking income rather than growth.
- Understand and accept there is a risk to capital and how the Capital Protection Barrier works.
- Understand the impact of global economic issues and how they will affect the product.
- Understand the criteria which will determine the income payments.
- Are looking to invest for the medium to long term, being happy to remain invested until maturity.
- Can afford to have their cash invested for the full term of the Product.
- Wish to use this investment as part of a well-diversified portfolio.
- Understand that the returns are pre-defined and that they will forgo any growth in the Underlyings which exceeds the fixed level available with this investment product.
- Understand the risk to capital in the event of a counterparty default.
- Should they need to sell their investment, accept that the trading price will likely mean they get back less than they invested.
- Appreciate that income payments are conditional but understand that the memory feature can deliver previously d income payments.

Movement in the Underlyings over a 12 year period

12 year back-testing

- Back-testing shows how the investment would have performed historically using data from previous potential strike dates and observations. Although past performance is not an indication of future performance, it can give a factual insight into how the investment would have performed historically.
- This 12 year back-test shows the historical data for a full 6 years of 6 year products that could reach the full term.
- Of the 1,501 product scenarios tested, 0.40% would reach the full term without autocalling and none of these would have breached the Capital Protection Barrier.
- Every coupon observation has also been tested, and out of all 1,501 product scenarios tested, 100% of coupons would have been paid.

Selling restrictions for securities

The purchaser ("Purchaser") of the securities ("Securities") represents and agrees that the Securities shall not be offered, advertised, sold or otherwise transferred, either directly or indirectly to any person in violation of economic sanctions or wider restrictions applicable to either the Purchaser or the Issuer. The information contained herein does not constitute an offer or invitation to purchase securities (the "Securities") by anyone in any jurisdiction in which such offer or invitation is not authorized or to any person to whom it is unlawful to make such offer or invitation. The distribution of this document and the offering or sale of the Securities may be prohibited or restricted by law in some jurisdictions. The Securities may not be publicly offered, sold or delivered within or from the jurisdiction of any country, except in accordance with the applicable laws and other legal provisions, and provided further that the Issuer does not incur any obligations. The Issuer has not undertaken any steps, nor will the Issuer undertake any steps, aimed at making the public offering of the Securities or their possession or the marketing of offering documents related to the Securities legal in such jurisdiction if this requires special measures to be taken.

UK Retail Restrictions: None
EEA: The requirements for a public offer in any member state of the European Economic Area ("EEA Member State") are not fulfilled. Consequently, the Securities may not be publicly offered in any of the EEA Member States except as explicitly provided under the prospectus exemptions of Directive 2003/71/EC (as amended by Directive 2010/73/EU, to the extent implemented in a relevant EEA Member State ("2010 Amending Directive"), the "EU Directive") with respect to inter alia (i) an offer of securities addressed solely to qualified investors as defined in the EU Directive, and/or (ii) an offer of securities addressed to fewer than 100, or, if the EEA Member State has implemented the relevant provisions of the 2010 Amending Directive, 150 natural or legal persons per EEA Member State other than qualified investors, and/or (iii) an offer of securities addressed to investors who acquire securities for a total consideration of at least EUR 50,000, or, if the EEA Member State has implemented the relevant provisions of the 2010 Amending Directive, EUR 100,000, and/or (iv) an offer of securities whose denomination per unit amounts to at least EUR 50,000 or, if the Relevant Member State has implemented the relevant provisions of the 2010 Amending Directive, EUR 100,000.
United States of America: This document is not for distribution, directly or indirectly, in or into the United States of America ("United States") or its possessions. This document is not an offer to sell securities, or the solicitation of any offer to buy securities, nor shall there be any offer of securities in the United States or in any jurisdiction in which such offer or sale would be unlawful. The Securities have not been and will not be registered under the U.S. Securities Act of 1933, as amended ("Securities Act"), and may not be offered or sold in the United States absent registration or exemption from registration under the Securities Act.
